DETAILED ACTION

Claim Objections

1. Claims 28 is objected to because of the following informalities: the claim is the same as 27. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 20 and 27-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not understood what "wider" means. Wider in relation to what other element.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11, 12, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Igashira et al.

With respect to claim 11, the reference discloses in **fig. 1** a piezoelectric actuator for actuating control or injection valves having a cylindrical, laminated actuator where the actuator has a bore **12** with a common electrode **13** in contact with the first electrode layers.

With respect to claim 12, the reference discloses in **fig. 1** the second common electrode **17** on the outer wall.

With respect to claim 13, the reference discloses both the first **116** and the second **117** common electrode on the inner wall.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-19 and 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mochizuki et al (JP 08-306979).

With respect to claim 15, the reference discloses in **figs. 3** and **10** a piezoelectric actuator comprising a cylindrical, laminated piezoelectric actuator body and first **4** and second **5** common electrode disposed on the out outer wall, angularly offset.

With respect to claim 16, the reference discloses in **fig. 3** the first **4** and second **5** contact points are diametrically opposed.

With respect to claims 17, 18, and 21-23, the reference discloses a recess for both the first and second electrode layers in **fig. 10**.

With respect to claim 19 and 24-26, the reference discloses narrow strips in **fig.**

3.

Allowable Subject Matter

5. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
